

# TYPES OF ANTICIPATED ACTIVITY

1 **Very Low Activity**  
(Relaxation / Minimal Physical Exertion)

2 **Low Activity**  
(Heightened Awareness / Slight Physical Exertion)

3 **Low to Moderate Activity**  
(Interaction / Higher Levels of Physical Exertion)

4 **Moderate to High Activity**  
(Heightened Physical Activity)

5 **High Activity**  
(High Levels of Physical Exertion / Frequent Interaction)

6 **Very High Activity**  
(Exercise & High Energy Activities)

# TYPICAL ROOM OCCUPANCY

1 Solitary

2 Couples

3 Family

4 More Family (or Friends)

5 Discussions /Meetings

6 Parties / Large Groups

2 LARGE BUT CONTAINED

3 SMALL BUT SPACIOUS

4 SMALL AND COZY

# Your Personal Room Color Profile

Room Selected:

## Your Favorite Color Family:

- Blue / Blue-Violet / Blue-Green ☐
- Yellow / Yellow-Green / Yellow-Orange ☐
- Red / Red-Orange / Red-Violet ☐

## Types of Anticipated Activity:

- Very Low Activity ☐
- Low Activity ☐
- Low- Moderate Activity ☐
- High - Moderate Activity ☐
- High Activity ☐
- Very High Activity ☐

## Typical Room Occupancy:

- Solitary ☐
- Couples ☐
- Family ☐
- More Family ☐
- Discussions / Meetings ☐
- Parties / Large Groups ☐

## Available Light / All Sources:

- Dark ☐
- Low light ☐
- Moderate ☐
- Bright ☐
- Very Bright ☐

## Room Exposure:

- South ☐
- West ☐
- Southeast ☐
- Northwest ☐
- East ☐
- North ☐
- No Exterior Exposure ☐

## Desired Spatial Effect:

- Large and Open ☐
- Large but Contained ☐
- Small but Spacious ☐
- Small and Cozy ☐

Figure 8J

## SUMMARY OF LOGIC

1. Select room to be decorated.
2. Choose favorite Basic Color Family
3. On a scale of 1 to 10, estimate the level of activity anticipated for this space.  
10 might indicate a recreational space where, for example, people might be shooting pool, dancing, exercising, etc. 1 might indicate a room for sleeping, reading, or simply meditating.
4. Next, estimate the number of people that will typically use the room.  
10 would indicate large numbers of people; 1, solitary use such as a library or individual bedroom.
5. Now estimate the amount of natural light available in the room with 5 indicating no natural light, and 1 indicating a large amount.
6. Gauge the approximate exposure of the room.
7. Finally, consider spatial emphasis; how do you want to either enhance or overcome the room's inherent spatial limitations? Do you want the room to appear large and open, small and cozy, or somewhere in between?
1. Together, designer & client choose.
2. Reduces number of columns to 26.
3. Moves target indicator two columns in any given direction depending on the level of activity indicated by the customer. A ten would select the last two columns on the right in the direction of warmer colors; a three would select the 5<sup>th</sup> and 6<sup>th</sup> columns from the left boundary of the color family.
4. Fixes the target indicator on the row with 10 being on Row 1, 9 on Row 2, 8 on Row 3, etc. The target area is expanded four rows and four columns on each side from the intersection between the columns of step 3 and the target row chosen.
5. A choice of 4 or 5 moves the range to the top four rows of the target; choosing 3 to the middle four rows; 1 or 2 to the bottom four rows.
6. N or E corresponds to the warmest two columns; etc.
7. The final eight choices are divided into quadrants, with each quadrant representing one of the four spatial emphases. Small & cozy matches up with the warmest and darkest two of the eight colors, etc.
